

I am wrting to urge the FCC to postpone making a decision on broadcast ownership until further hearings are held around the country to provide an opportunity, thus far largely denied, for the public to understand the ramifications of what is being proposed and to have an opportunity to share their views with the FCC. The airwaves belong to the public. We are the owners. We have a right to be allowed to be more involved in the decision, given the consequences to our airwaves. Thank you for your consideration of this request.
